LEGEND/KEY TO INTERPRET THE PROCESS FLOWCHARTS

Colour	Meaning
Black	General process flow: Represents the standard or main steps in the process.
Green	Logically correct flow/next step: Indicates the correct or intended progression in the process. Do not assume green always means "yes".
Red	Logically incorrect flow/next step: Identifies incorrect, non-compliant, or exception flows. Do not assume red always means "no".

2 INTRODUCTION

ABOUT CARSOME SDN. BHD

CARSOME is Southeast Asia's largest integrated car e-commerce platform. Founded in Malaysia in 2015, the company operates across multiple countries in the region — including Malaysia, Indonesia, Thailand, Singapore, and the Philippines

It offers a full end-to-end service — from inspection, valuation and dealer bidding to ownership transfer, financing and after-sales support — delivering a transparent, convenient and reliable car-trading experience. CARSOME focuses on creating a transparent and trusted car-ownership experience through technology and data-driven processes. Operating across several countries in the region, CARSOME has built a strong ecosystem that connects consumers, dealers, and automotive service providers. The company continues to expand its offerings to enhance customer confidence and improve standards within the used-car industry.

OBJECTIVE AND PURPOSE OF THE DOCUMENT

The overarching objective of implementing Coupa applications at Carsome is to establish a best-in-class, integrated supplier ecosystem. This transformation is expected to deliver significant benefits, including but not limited to enhanced automation of procurement processes, improved spend visibility and control, increased policy compliance, optimized working capital, reduced operational costs, and more effective supplier collaboration.

The purpose of this document is to meticulously capture and articulate the future state supplier processes for Carsome, as they will be executed within the Coupa environment. This document will detail the following for each key process area:

1. **Process Description:** Summary of the process, outlining its role within Carsome's supplier lifecycle.
2. **Process Objective:** Clear articulation of the redesigned process's goals and expected value.
3. **Future State Process Flow Diagram:** Flowchart-style visuals showing activity sequences, decisions, and stakeholder roles.
4. **Future State Process & Functional Requirements:** Stepwise future process, Coupa system touchpoints, data, and key functionalities.
5. **Assumptions / Pre-requisites:** Foundational conditions and key dependencies needed for process success.
6. **Exception Management:** Defined approach for handling deviations and non-standard process scenarios.

This document will serve as a central reference for all stakeholders involved in the Coupa supplier implementation, including the Carsome project team and business users. It will guide system configuration, testing, training, and change management activities, ensuring alignment between business requirements and the final Coupa solution. The document is intended to be a living document, subject to review and updates as the project progresses, and further details emerge.

KEY ASSUMPTIONS

The design of future state supplier processes and the development of this BRD are based on the following key assumptions. These assumptions will be validated and refined throughout the project lifecycle:

1. The Coupa supplier applications, including its core modules, will be the primary platform for executing the To-Be processes mentioned.

Business Requirement Document (BRD) – Coupa Supplier Management

2. Carsome' s existing Enterprise Resource Planning (ERP) system (NetSuite) will be integrated with Coupa for critical master data synchronization (such as suppliers). The ERP will remain the financial system of record.
3. Standard Coupa functionalities and best practices will be adopted wherever possible to minimize customization and ensure long-term maintainability and upgradeability of the solution.
4. Carsome is committed to the necessary change management activities to support the adoption of new processes and the Coupa system by all relevant users.
5. Sufficient resources from Carsome (including subject matter experts from Procurement, Finance, IT, and business units) will be available to participate in workshops, provide requirements, review this document, conduct testing, and support deployment.
6. Data migration from legacy systems to Coupa (active suppliers' data) will be planned and executed as a separate workstream, with defined scope and responsibilities.

RELATION TO OTHER ACTIVITIES

The development of this document and the overall Coupa supplier implementation at Carsome is interconnected with several other activities and initiatives within the firm. Successful execution will depend on effective coordination and management of these dependencies:

1. **Master Data Management:** A thorough review, cleansing, and governance strategy for key master data elements (e.g., supplier master, user data, other master data) is crucial. This will ensure data quality and consistency between Coupa and integrated systems like NetSuite.
2. **Integration Development:** Interfaces between Coupa and Carsome' s existing systems (primarily NetSuite) will need to be designed, built, tested, and deployed. This BPD will inform the data and process requirements for these integrations.
3. **Change Management and Training:** A comprehensive change management plan, including communication, stakeholder engagement, and user training programs, will be essential to drive adoption of the new supplier processes and the Coupa platform across Carsome.
4. **Policy Harmonization:** Existing procurement and Supplier Management policies at Carsome may need to be reviewed and updated to align with the capabilities of the Coupa system and the objectives of the supplier transformation.
5. **Technology Infrastructure:** Ensuring that Carsome' s technology infrastructure (network, security, single sign-on) is prepared to support the cloud-based Coupa solution.
6. **Project Governance:** This BPD will be a key input for the overall project governance framework, guiding scope management, progress tracking, and decision-making throughout the implementation lifecycle.

This document will be developed and finalized through collaborative workshops and discussions involving key stakeholders from relevant departments at Carsome (including Procurement, Finance, IT, and various business units), working closely with the project team.

CURRENT STATE PAIN POINTS IN SUPPLIER PROCESS.

Carsome has identified several critical pain points within its existing supplier processes. These challenges underscore the need for the strategic implementation of the Coupa supplier platform, which aims to address these issues and drive significant improvements in efficiency, control, and compliance. The key pain points identified are detailed below, providing context for the transformative objectives of this project.

1. **Lack of Centralization:** Supplier processes are fragmented across departments, preventing standardization and visibility into organizational spend.
2. **Poor Visibility & Tracking:** Limited access to real-time data on Suppliers, requisitions, orders, invoices, and payments hampers decision-making and budget control.

Business Requirement Document (BRD) – Coupa Supplier Management

3. **Inefficient Vendor Communication:** Reliance on manual methods like emails and calls leads to delays, errors, and strained supplier relationships.
4. **Manual Workload:** Heavy dependence on manual processes increases error rates, consumes time, and reduces focus on strategic tasks.
5. **Compliance & Policy Gaps:** Weak enforcement of procurement policies risks maverick spending, non-compliance, and audit issues.

The Coupa platform is being implemented to resolve these issues by enabling a centralized, automated, and transparent process.

3 SUPPLIER INFORMATION MANAGEMENT OVERVIEW

This section is to outline the process and the design to be built into the Coupa Test/production instance for the Supplier Information Management (SIM). SIM helps manage supplier information metadata, process, and approvals. SIM streamlines requesting, approving, onboarding, and maintaining supplier information such as company registration document, Tax certifications as well as contact information.

Using forms, approval workflows, and notifications, SIM helps to ensure:

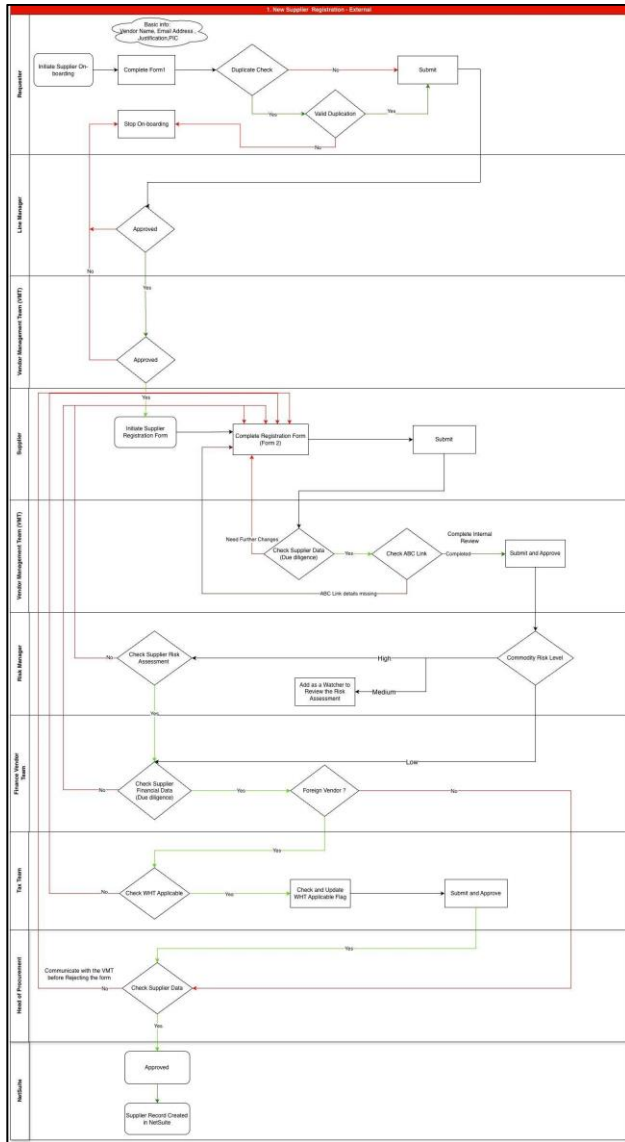

- Unvetted suppliers or services go through the proper approval channels.
- Information for all suppliers is accurate and current.
- Visibility to certifications and contact information.
- Multiple channels of managing information (e.g. paper forms, emails, phone calls, spreadsheets) are eliminated.
- Supplier participation.
- Accurate supplier data is maintained.

Coupa SIM manages the Supplier creation and onboarding process, and a Supplier will be created in Coupa Supplier record only when the Supplier has completed the onboarding process. Here, Coupa Supplier Record will be a list of only the onboarded vendors/suppliers.

3.1 NEW SUPPLIER REGISTRATION - EXTERNAL

Carsome's supplier onboarding process is designed for engaging suppliers with whom the organization intends to conduct business or procure goods and services. Either the Business or Procurement team can initiate the process by providing basic information, such as the supplier's company name, email address etc. Following initiation, the request undergoes an internal approval workflow. Once approved, an invitation is sent to the supplier via email, prompting them to register with Carsome and complete the required due diligence steps. This structured approach follows industry best practices for supplier onboarding within the Coupa platform.

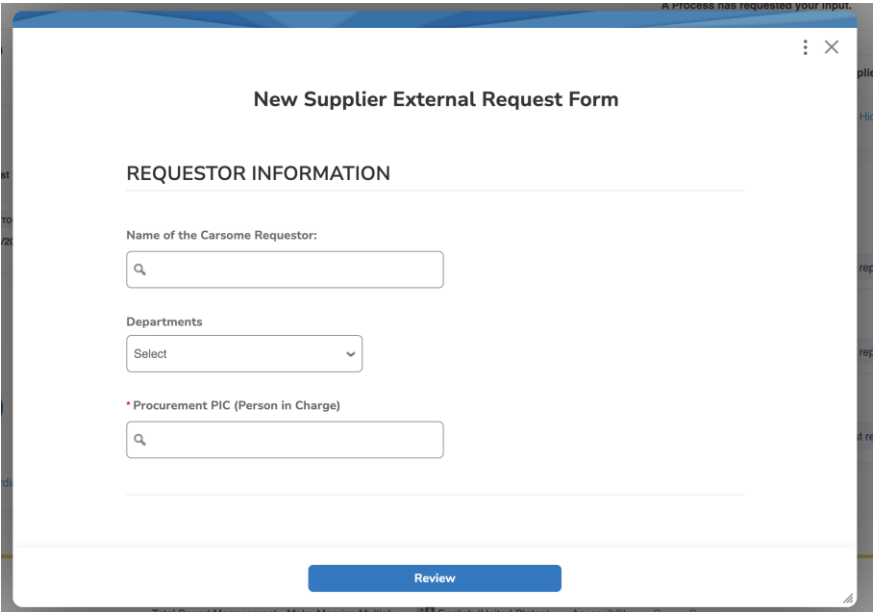

Business Requirement Document (BRD) – Coupa Supplier Management

3.1 New Supplier Registration - External

Link: https://drive.google.com/file/d/1olwG4v8rmlz11ZKWuCyZlb0mXf-wtXm5/view?usp=drive_link

Process Design Steps

The following section provides a comprehensive and detailed explanation of each step illustrated in the corresponding process diagram on every page. This structured approach is intended to enhance clarity, support better understanding of the workflow, and offer meaningful context to stakeholders reviewing the process design. Each description aligns with the visual representation to ensure consistency and facilitate informed decision-making.

Activity ID	Activity Description	Detailed Description
3.1.1	New Supplier Request	The onboarding process for a new supplier will be initiated by the Requester. To begin, users must click the “External Supplier Onboarding” button, located under Explore Shortcuts on the Home screen. Supplier Forms  Internal Supplier Onboarding  External Supplier Onboarding  Supplier Status Update Clicking this button will launch the New Supplier Request form, which prompts the requester to enter essential supplier information.  Required fields include: ● Requestor Information ○ Name of the Carsome Requestor <i>(Mandatory)</i> ○ Departments <i>(Mandatory)</i> ○ Procurement PIC (Person in Charge) <i>(Mandatory)</i> ● Vendor Information

Business Requirement Document (BRD) – Coupa Supplier Management

Activity ID	Activity Description	Detailed Description
		○ Country of Onboarding <i>(Mandatory)</i> - Malaysia - Indonesia - Philippines - Singapore - Thailand ○ Entity ○ Vendor Name <i>(Mandatory)</i> ○ Display Name ○ Parent Company Name ○ Primary Contact (System Form) <i>(Mandatory)</i> ○ Primary Address <i>(Mandatory)</i> ● Company Registration Number ● Procurement Involved - Yes - No ● Justification <i>(Reference to the Raid Log S.No :181)</i> ● Procurement Category - Procurement - Non - Procurement ● Activity Type <i>(Mandatory)</i> - Trade - Non-Trade <i>(Reference to the Raid Log S.No :4)</i> <i>(Reference to the Raid Log S.No :182)</i> ● Payment terms <i>(Mandatory)</i> ● Supplier Type - Goods - Service

Business Requirement Document (BRD) – Coupa Supplier Management

Activity ID	Activity Description	Detailed Description
		- Both • Primary Commodity <i>(Mandatory)</i> • Is Supplier Trainer or Influencer? <i>(Mandatory)</i> - Yes - No • Supplier Individual Category • Justification <i>(Mandatory)</i> <i>(Reference to the Raid Log S.No :10)</i> After all necessary fields are completed and the form is submitted, the system automatically checks for potential duplicates based on the Supplier Name, Company Registration Number and Email ID. If duplicates are detected, the user is alerted. Additionally, any missing or incomplete fields are highlighted in red, prompting the user to review and correct the form before final submission. <i>(Reference to the Raid Log S.No :127)</i> <i>(Reference to the Raid Log S.No :180,185)</i>
3.1.2	Supplier Request Approvals	Once the 'New Supplier Request Form' is submitted, the approval process is automatically initiated in accordance with the designated Workflow. Line Manager - The Line Manager examines the justification and supplier details to decide whether the onboarding should proceed. If the Line Manager approves the request, the process moves forward to the next Approver. However, if the request is not approved, the onboarding is stopped, and the supplier is not registered. Vendor Management Team – The Vendor Management Team examines the justification and supplier details to decide whether the onboarding should proceed. If the Vendor Management Team approves the request, the process moves forward. However, if the request is not approved, the onboarding is stopped, and the supplier is not registered. In the event of Rejection, the system will prompt the Approvers to provide Rejection comments. These comments will be received by the Requester, allowing them to review the feedback and resubmit the request with the necessary corrections.

		 In the event of Rejection, the system will prompt the Approvers to provide Rejection comments. These comments will be received by the Requester, allowing them to review the feedback and resubmit the request with the necessary corrections. <i>(Reference to the Raid Log S.No :183)</i>
3.1.3	Coupa auto triggers the External Onboarding form	Once the New Supplier Request form is approved, Coupa will automatically trigger the External Onboarding Form. This form is sent directly to the Supplier and is designed to collect comprehensive details required for onboarding. The Supplier will be prompted to provide information such as company registration details, banking information, tax details, risk assessment details, and any relevant compliance documents. This ensures that all necessary data is captured accurately and securely to facilitate smooth integration into the procurement system.
3.1.4	Supplier fills up the External Onboarding form	The external Supplier Onboarding form gets triggered via email to the supplier.

3.2 NEW SUPPLIER REGISTRATION – INTERNAL

Carsome's supplier internal onboarding process is designed for engaging suppliers with whom the organization intends to conduct business or procure goods and services. Either the Business or Procurement team can initiate the process by providing basic information, such as the supplier's company name, email address etc. Following initiation, the request undergoes an internal approval workflow. Once approved, the form is sent to the requester, prompting them to register with Carsome on behalf of Supplier and complete the required due diligence steps. This structured approach follows industry best practices for supplier internal onboarding within the Coupa platform.

Business Requirement Document (BRD) – Coupa Supplier Management

3.2 New Supplier Registration – Internal

Activity ID	Activity Description	Detailed Description
3.2.1	Internal Supplier Request	The internal registration onboarding process for a new supplier can be initiated by either the Requester or Procurement team. To begin, users must initiate the internal registration form. Supplier Forms  Internal Supplier Onboarding  External Supplier Onboarding  Supplier Status Update

Activity ID	Activity Description	Detailed Description
3.2.2	Internal Supplier Request Form Approvals	The internal supplier registration process begins when the Requester completes Form 1 by providing key information, such as the requester's details, supplier's name, email address, justification, and other basic details. New Supplier Internal Request Form REQUESTOR INFORMATION Name of the Carsome Requestor: Departments Select * Procurement PIC (Person in Charge) Select Review Required fields include: - Requestor Information - Name of the Carsome Requestor <i>(Mandatory)</i> - Departments <i>(Mandatory)</i> - Procurement PIC (Person in Charge) <i>(Mandatory)</i> - Vendor Information - Country of Onboarding <i>(Mandatory)</i> - Malaysia - Indonesia - Philippines - Singapore - Thailand - Entity - Vendor Name <i>(Mandatory)</i> - Display Name <i>(Mandatory)</i> - Parent Company Name

Business Requirement Document (BRD) – Coupa Supplier Management

Activity ID	Activity Description	Detailed Description
		After entering the details, a duplicate check is performed. If the supplier fails this duplication check, meaning it is not a valid addition, the onboarding process is stopped. However, if the supplier passes the check as a valid duplication of Name, Company Registration Number and Email Address, the Requester proceeds to submit the form for further approvals. Once the 'New Supplier Request Form' is submitted, the approval process is automatically initiated in accordance with the designated workflow. <i>(Reference to the Raid Log S.No :127)</i> <i>(Reference to the Raid Log S.No :180,185)</i>
3.2.3	Internal Request Approvals	 Line Manager - The Line Manager examines the justification and supplier details to decide whether the onboarding should proceed. If the Line Manager approves the request, the process moves forward to the next Approver. However, if the request is not approved, the onboarding is stopped, and the supplier is not registered. Vendor Management Team – The Vendor Management Team examines the justification and supplier details to decide whether the onboarding should proceed. If the Vendor Management Team approves the request, the process moves forward. However, if the request is not approved, the onboarding is stopped, and the supplier is not registered. In the event of Rejection, the system will prompt the Approvers to provide Rejection comments. These comments will be received by the Requester, allowing them to review the feedback and resubmit the request with the necessary corrections.
3.2.4	Internal Supplier On-Boarding Form	Requester - After approval from the Vendor Management Team, the Requester initiates the Internal Supplier Registration Form (Form 2).

3.3.4	Validation and Approvals	Upon receiving the registration form, the Vendor Management Team reviews the supplier’s data to ensure all submitted information is accurate and complete.

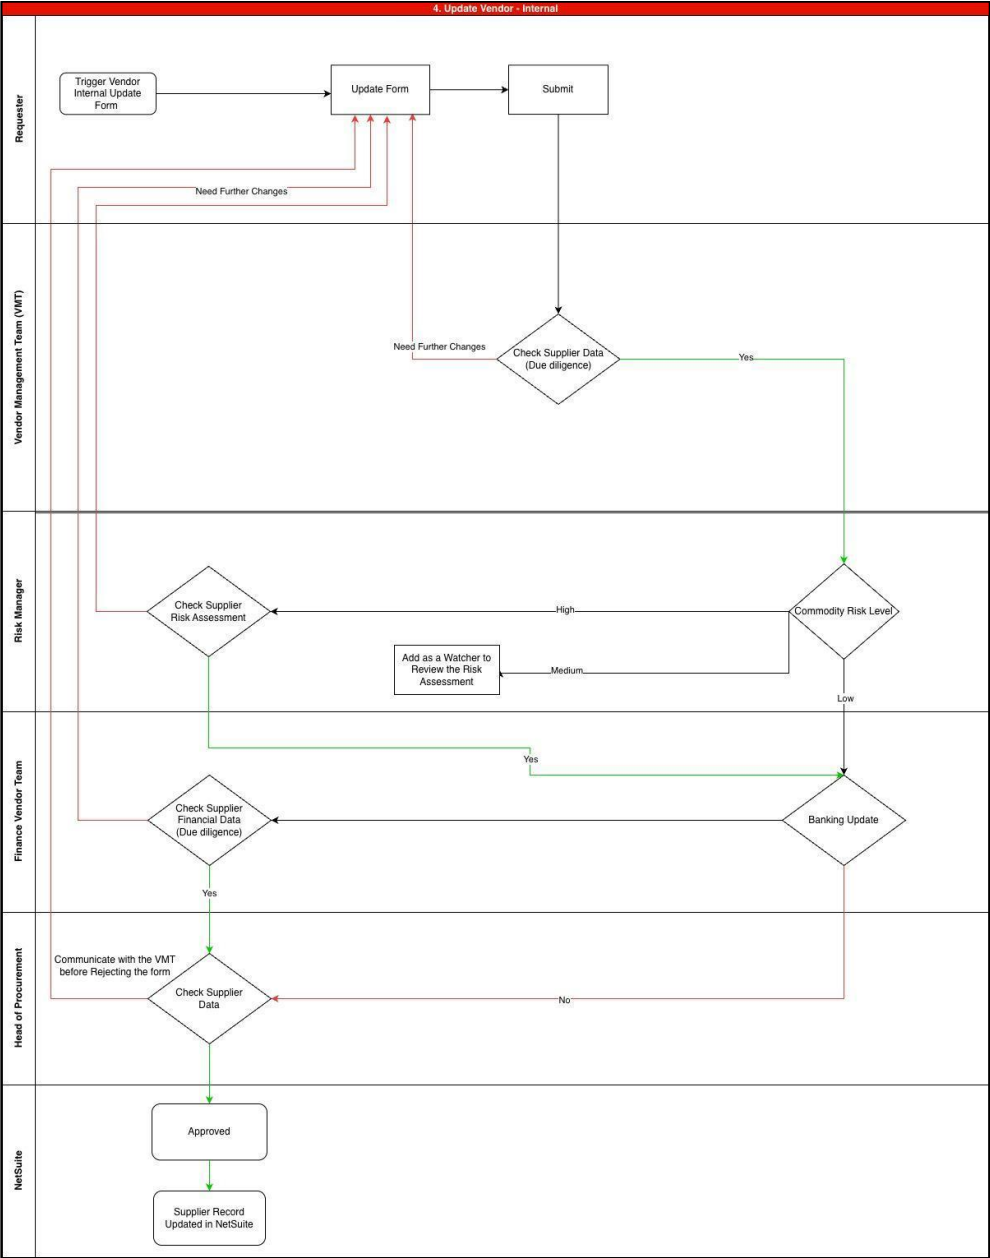

Business Requirement Document (BRD) – Coupa Supplier Management

Activity ID	Activity Description	Detailed Description
		 Vendor Management Team - The first step involves validation by the Vendor Management Team who will thoroughly review the updated details for accuracy and completeness. This includes performing supplier data due diligence. If any corrections are needed, the Vendor Management Team will reject the form, adding comments for clarification, and return it to the supplier for necessary updates. Once validated, the request will move forward to the Next Approver. Any registered name change should be treated as a new supplier entry in Coupa. <i>(Reference to the Raid Log S.No :2)</i> Approval blockers have been implemented to prevent the VMT from approving the form unless the above details are provided. <i>(Reference to the Raid Log S.No :189)</i> Risk Manager: The Risk Manager will be incorporated into the workflow based on the selected commodity in the Primary Commodity and the Other Commodity. If the chosen commodity falls under the High-Risk category, the Risk Manager will conduct a detailed review of the Risk Assessment information provided by the supplier. Upon satisfactory evaluation, the Risk Manager will approve the form. For Medium-Risk commodities, the Risk Team will not participate in the approval process but will instead be added as watchers, allowing them to monitor the submission without taking direct action. Low-Risk is not required Risk team and route to Finance Vendor Team If corrections are needed, Risk Manager will reject the form with comments and return it to the supplier for necessary changes. The request will then be routed to the Finance Vendor Team if banking details are updated by the supplier.
3.3.5	Validation and Approvals	Finance Vendor Team – Finance Vendor Team checks the supplier's financial data to ensure it meets internal compliance standards.

Business Requirement Document (BRD) – Coupa Supplier Management

Activity ID	Activity Description	Detailed Description
		If discrepancies or incomplete information are found, the Finance Vendor Team rejects the form with comments for correction. If the financial data is accurate, the Finance Vendor Team approves the form. Head of Procurement – The Head of Procurement will verify the submitted details. Upon completing their validation, the Head of Procurement will approve the form. If any changes are required, the Head of Procurement will reject the form, provide comments and clarification by the Vendor Management Team, and send it back to the supplier for corrections. At any stage, if an approver rejects the form, it is sent back with comments for necessary corrections before resubmission. 1. Approved – If the request is approved at all levels, the supplier record is successfully updated in NetSuite. 2. Rejected – If the request is rejected at any point, it is sent back with comments for correction and may be resubmitted after the necessary updates are made.
3.3.6	Integration from Coupa SIM to NetSuite to update a Supplier record in NetSuite	Supplier details will be seamlessly integrated from Coupa Supplier Information Management (SIM) into NetSuite. During this process, the Supplier record will be updated in NetSuite and will be assigned also reflecting the vendor's change.
3.3.7	Integration from NetSuite to Coupa to update the Supplier in Coupa	Once the supplier is successfully updated in NetSuite, the key details are automatically synchronized with the corresponding Supplier record in Coupa. Activity ID	Activity Description	Detailed Description
		● Purchase Block ○ Purchase Block ● Deactivate a Supplier ○ Deactivate a Supplier ● Justification of the Update  The responsible team triggers the update request in the system. If, upon review or discussion, the update is no longer required, the team has the option to stop the update process at this stage.

Activity ID	Activity Description	Detailed Description
		
3.5.3	Update Request Approvals	Once the update is triggered, the request is routed to the Vendor Management Team, Finance Team and Head of Procurement for Approval.  The Approvers reviews the nature and necessity of the status update. If the Approvers approves the request, it proceeds further for execution. If the Approvers rejects the request, the process is stopped, and the requester is notified via email to halt the update. In the event of Rejection, the system will prompt the Approvers to provide rejection comments. These comments will be received by the internal requester, allowing them to review the feedback and resubmit the request with the necessary corrections.
3.5.4	Integration from Coupa SIM to NetSuite	Supplier details will be seamlessly integrated from Coupa Supplier Information Management (SIM) into NetSuite. During this process, the Supplier record will be updated in NetSuite ensuring the vendor record reflects the current and approved status.

Business Requirement Document (BRD) – Coupa Supplier Management

Activity ID	Activity Description	Detailed Description
3.5.5	Integration from NetSuite to Coupa	The process is considered complete once the approved changes are successfully updated in NetSuite.

4 ONE TIME VENDOR DETAILS

One-time vendor transactions in Coupa will be created using a dummy or sundry account configured in the system. For each one-time vendor transaction, users will select the **Sundry Supplier** in the supplier field on the requisition and enter the actual supplier name within the requisition details. This will enable accurate tracking and reporting of one-time supplier transactions by supplier name.

2	Supplier On-Boarding Form are Reviewed by Procurement Admin.	Vendor Management Team
3	The Banking details are reviewed by the Finance Team.	Finance Vendor Team
4	Once all validations are complete, Supplier to be Approved.	Procurement/Risk Manager/Tax Team/Head of Procurement
5	Supplier is created in NetSuite	Procurement

6 SUPPLIER STATUS

Coupa uses different status labels to help users quickly see the status of each supplier.

Supplier Record Status

Status	Description
Active	The Supplier Record will be set to Active through integration from NetSuite to Coupa.
Onboarding	Once the Internal Onboarding form has been Approved, the Supplier Record is set to Onboarding.
Inactive	Inactive Suppliers remain in the system; however, these Suppliers cannot be used for Sourcing Events.

Supplier Portal (CSP) Status (STANDARD STATUS OF CSP)

In the Suppliers table, use the Supplier Portal Status column to see CSP statuses.

Status	Description
Invited	The supplier has been invited to the CSP but has not completed the linking process.
'Draft' or 'Inactive' Status	The supplier record is in Draft or Inactive status and cannot be linked until it is in Active status.
Name and Email Missing	The supplier record is missing the supplier contact's name and email. You cannot send a CSP invite until this information is complete.
Linked	The supplier is linked to you on the CSP, and you can transact with them using the CSP.

Business Requirement Document (BRD) – Coupa Supplier Management

Status	Description
Not Linked	The supplier is not linked to you on the CSP. You can send them an invite in the Actions column of the Suppliers table.
Name missing	The supplier contact's name is missing from the supplier record. You cannot send a CSP invite until this information is complete.
